

## Improve Bridgeport Knee Mill Performance with Automatic Lubrication

### FEATURES & BENEFITS

- Bijur Delimon Single Line Resistance Systems are compact, economical and simple to operate and maintain.
- A precisely controlled discharge of oil is delivered to each point while the machine is in operation.
- The system provides a clean film of oil between critical bearing surfaces to keep friction and wear to a minimum. Box ways and seal wiper life are extended and production efficiency is maintained.

*Adding a Bijur Delimon lubrication system increases equipment life by decreasing wear on vital components. Automatic Lubrication systems safely and continuously supply lubricant while your machine is running.*

## System Description

A Bijur Delimon automatic lubrication system begins with a self-contained motor driven pump that is designed to operate at pre-determined regular intervals. This is controlled by a built-in timing mechanism.

Flow devices or meter units proportion the oil to the bearings or friction points. Bijur Delimon offers numerous sizes to deliver the optimal quantity of oil to each bearing or surface.

Bijur Delimon also offers a full line of tubing, junctions, adapters, clips and connection hardware to complete the distribution network. All components are available for immediate shipment from our large inventory.

Please contact the experts from Bijur Delimon for assistance in converting your Knee Mill to an automatic lubrication system.
